Art Unit: 1714

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants recite a "mass ratio of ethylene" in each of the independent claims. Applicants have not specified to what ratio is being defined; ethylene/vinyl acetate or ethylene/ethylene vinylacetate.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-12 and 14-20 are rejected under 35 U.S.C. 102(b) as being anticipated by WO '968.

WO '968 discloses adhesive latex compositions comprising copolymers of chloroprene and carboxylic acids suitably polymerized in the presence of polyvinyl alcohol and ethylene vinylacetate (see page 6, lines 5-8 and page 7, lines 12-27).

These adhesives are further taught as comprising tackifier resins and zinc oxide and as pH adjusted to values within the range claimed instantly (page 6, lines 16-22 and page 9, lines 3-17). The materials taught as suitably adhered to one another include fabric and foam (page 11, lines 14-20).

Claims 4 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
